

How to make a Sock Puppet

There are always plenty of odd socks around the house. Why not make something fun out of them.....

What you need:

A clean sock!

Scissors

Strong glue, needle and thread

Cardboard

Things you would like to stick on your sock puppet

What to do:

- To make a mouth for your sock puppet, cut a slit in the sock (normally where you find your toes) about 5cm long
- Cut a piece of cardboard into an oval shape (like the picture below), roughly the same size as the hole in your sock and stick it over the hole.

- Decorate as you wish, remember sock caterpillars come in all different shapes, sizes and colours.
